### A Stray's Journey to Healing

A stray cat arrived at the Pasha Wing of CGS Veterinary Hospital with a severe limp and was diagnosed with a fractured left femur. Surgery was the best option, but the rescuer couldn't afford the treatment. Determined to help, CGS performed a specialized Hybrid Tie-in Fixation to heal the broken bone.

For two months, the cat received expert care, love, and attention. When the implant was finally removed, the results were astounding—the bone had healed perfectly! Today, this once-injured stray is full of life, happily jumping and playing again.
